I help businesses build reputable brands around their dreams.

Work Experience

Django e-commerce website

Personal project

March 2023 to May 2023

I successfully created a Django e-commerce website, it comprises of a database system. And a frontend from where the user can select a product and place order.

ROT13 Cipher

JavaScript personal project

February 2023 to March 2023

ROT13 is a word substitution cipher which encodes text. It works by shifting each letter in a word by 13 place. B gets encoded as O and C becomes P and so on.

Book website

Personal project

January 2023 to February 2023

I successfully built a book website with a well designed database from where the admin can create, retrieve, update and delete books on the website.
